

SUN PROTECTION POLICY

Mandatory – Quality Area 2

This policy was prepared with the assistance of ELAA policy resources, which was in consultation with Cancer Council Victoria's SunSmart Program. The SunSmart Sample Sun Protection Policy was last updated in August 2023 and is incorporated into the ELAA policy. For more detailed information visit the SunSmart website: www.sunsmart.com.au

PURPOSE

This policy will provide:

- guidelines to ensure children, staff, volunteers and others participating in Panorama Heights Preschool programs and activities are well protected from overexposure to ultraviolet (UV) radiation from the sun
- information for parents/guardians, staff, volunteers and children attending Panorama Heights Preschool regarding sun protection.

POLICY STATEMENT

VALUES

Panorama Heights Preschool is committed to:

- promoting sun protection strategies for children, families, staff and visitors to minimise the harmful effects of overexposure to the sun's UV radiation
- ensuring that curriculum planning will minimise overexposure to the sun's UV radiation and also promote an awareness of sun protection and sun safe strategies
- providing information to children, staff, volunteers, parents/guardians and others at the service about the harmful effects of exposure to the sun's UV radiation.

SCOPE

This policy applies to the Approved Provider, Person with Management or Control, Nominated Supervisor, Person in day to day Charge, staff, students, volunteers, parents/guardians, children and others attending the programs and activities of Panorama Heights Preschool.

This policy will apply during the daily local sun protection times or whenever the sun's UV levels reach three or higher. Whenever this occurs a combination of sun protection measures are to be used for all outdoor activities.

In Victoria UV levels are usually three or higher from mid-August to the end of April. Please check the daily local sun protection times (refer to *Definitions*) to be sure you are using sun protection when it is required. Active outdoor play is encouraged throughout the day all year, provided appropriate sun protection measures are used when necessary.

RESPONSIBILITIES	Approved provider and persons with management or control	Nominated supervisor and persons in day-to-day charge	Early childhood teacher, educators and all other staff	Parents/guardians	Contractors, volunteers and students
R indicates legislation requirement, and should not be deleted					
Ensuring that obligations under the Education and Care Services National Law and National Regulations are met	R	R			
Taking reasonable steps to ensure that all staff follow the sun protection policy and procedures	R				
Ensuring that copies of the Sun Protection Policy are readily accessible and available to all staff, volunteers and families	R	√			
Meeting the standards and requirements of the SunSmart early childhood program	R	√			
Ensuring that this policy is up to date with current SunSmart recommendations: www.sunsmart.com.au	R	√			
Monitoring the daily sun protection times for the service location and manage sun safe outdoor play and learning accordingly		√	√		√
Ensuring parents/guardians are informed about and agree to support the Sun Protection Policy on enrolment, including the need to provide an appropriate sun protective hat (refer to Definition) and sun protective clothing (refer to Definitions) and apply sunscreen before attending the service	R	√	√		
Applying sunscreen (refer to Definitions) to their child before the commencement of each session during the sun protection times (refer to Definitions)				√	
Providing, at their own expense, an alternative sunscreen (refer to Definitions) that meets our sunscreen requirements, to be left at the service if their child has a particular sensitivity to the sunscreen provided by the service				√	

Providing a supply of sunscreen for use on all persons to whom this policy applies	R	√			
Storing sunscreen in a cool place and monitoring the expiry date – including for sunscreen supplied by parents/guardians		√	√		√
Ensuring each child, and any other participant at the service, wears an appropriate sun protective hat (refer to Definitions), sun protective clothing (refer to Definitions) and sunscreen for all outdoor activities during the sun protection times (refer to Definitions)	√	√	√		√
Wearing a sun protective hat, sun protective clothing (refer to Definitions) and sunglasses (optional) when outside, applying sunscreen and seeking shade during sun protection times (refer to Definitions)	√	√	√		√
Co-operating with their employer with respect to any action taken by the employer to comply with the Occupational Health and Safety Act 2004		√	√		√
Providing a named, sun protective hat (refer to Definitions) for their child's use at the service				√	
Checking that all sun protective hats (refer to Definitions) brought to the service meet the SunSmart recommendation for adequate protection, are named and are stored individually	√	√	√		
Providing appropriate spare sun protective hats (refer to Definitions) for children and adults that will be laundered after each use	√	√			
Ensuring that children without appropriate sun protective hats (refer to Definitions) or sun protective clothing (refer to Definitions) play in the shade or in a suitable area protected from the sun	√	√	√		√
Encouraging children to wear sun protective hats (refer to Definitions) when travelling to and from the service				√	
Ensuring that program planning includes the application of a combination of sun protection measures for outdoor activities during sun protection times (refer to Definitions)	√	√	√		
Ensuring the sun protection times (refer to Definitions) on the SunSmart website or the SunSmart app are accessed daily to assist with the implementation of this policy	√	√	√		√
Ensuring there is adequate shade over areas for both active and passive outdoor play at the service grounds to protect children from overexposure to UV radiation (Regulation 114)	R	√			
Ensuring that the availability of shade is considered in a risk assessment prior to conducting excursions and other outdoor events (Regulations 100, 101)	R	√	√		
Encouraging children to seek shade when playing outside and utilise shaded areas for outdoor equipment that is not fixed during the sun protection times (refer to Definitions)		√	√		√
Ensuring that information on sun protection is incorporated into the educational program (refer to the SunSmart website)	√	√	√		

Monitoring, and where practical, adjusting outdoor learning and play experiences to minimise direct and indirect UV exposure		√	√		√
Ensuring that sun protection strategies are a priority when planning excursions	√	√	√		
Ensuring all staff are aware of the special needs of infants. Babies under 12 months should not be exposed to direct sun. They should remain in full shade and always be well-protected through the use of hats and cool, covering clothing when outside. With parental consent small amounts of a suitable SPF30 (or higher) broad-spectrum water-resistant sunscreen may be applied to babies over 6 months (delete if not applicable)	√	√	√		√
Communicating with families about SunSmart practices in general and specific expectations within the service (e.g., wearing protective clothing, sun protective hat styles)	√	√	√		√
Reinforcing this policy by providing information on sun protection (available on the SunSmart website) to service users via newsletters, noticeboards, meetings and websites etc.	√	√			

BACKGROUND AND LEGISLATION

Background

Overexposure to the sun's UV radiation can cause sunburn, skin and eye damage and skin cancer. Australia has one of the highest rates of skin cancer in the world. More than two in three Australians will be diagnosed with skin cancer in their lifetime.

Young children are particularly vulnerable to UV damage due to lower levels of melanin and a thinner stratum corneum (the outermost layer of skin). UV damage accumulated during childhood and adolescence is associated with an increased risk of skin cancer later in life.

A combination of sun protection measures (hats, clothing, sunscreen, shade and sunglasses) is recommended whenever UV levels are three or higher (the daily sun protection times) **(refer to Definitions)**.

The sun's UV can't be seen or felt. Whatever the temperature or weather, it's important for people of all skin types to use sun protection whenever UV levels are three or higher.

By teaching sensible sun protection habits from an early age and implementing sun protection measures, early childhood services can play a significant role in reducing skin cancer risk.

It is a requirement under the [Occupational Health and Safety Act 2004](#) that employers provide a healthy and safe environment for all persons who access the service's facilities and/or programs.

Legislation that governs the operation of approved children's services is based on the health, safety and welfare of the children and requires that children are protected from hazards and harm.

Legislation and standards

Relevant legislation and standards include but are not limited to:

- *Child Wellbeing and Safety Act 2005* (Vic) (Part 2: Principles for Children)
- *Education and Care Services National Law Act 2010*: Section 167
- *Education and Care Services National Regulations 2011*: including Regulations 100, 101, 113, 114, 168(2)(a)(ii)
- *National Quality Standard*, Quality Area 2: Children's Health and Safety
 - Standard 2.3: Each child is protected
 - Element 2.3.2: Every reasonable precaution is taken to protect children from harm and any hazard likely to cause injury
- *Occupational Health and Safety Act 2004*

DEFINITIONS

The terms defined in this section relate specifically to this policy. For commonly used terms e.g. Approved Provider, Nominated Supervisor, Regulatory Authority etc. refer to the General Definitions section of this manual.

Shade: Well-designed and positioned [shade](#) can significantly reduce direct and indirect UV exposure and create cool, comfortable spaces for outdoor learning and play. Shade can be natural (trees, shrubs or shadow cast from nearby buildings), built (pergola, shade sails, etc.), portable (shade umbrellas, marquees, etc.) or a combination of these. Ensure shade is easily accessible, aesthetically pleasing, in good condition and regularly maintained. Use surfaces that reflect less UV, e.g., natural, dark or rough surfaces such as grass, soil and tanbark. When combined with appropriate clothing, hats and sunscreen, children can be well protected from UV when outdoors. Research shows that early childhood service environments with trees, shrubbery, and broken ground not only provides better sun protection in outdoor play but also triggers more physical activity.

Sun protection times: The sun protection times are a forecast from the [Bureau of Meteorology](#) for the times of the day when UV levels are forecast to be three and above. At these levels there is a risk of skin damage for all skin types. In Victoria, UV levels regularly reach three and above from mid-August to the end of April. You can find the sun protection times for your location on the free SunSmart Global UV [widget](#) or [app](#), at sunsmart.com.au, at myuv.com.au or in the weather section of the daily newspaper.

Sun protective clothing: If you can see skin, UV can reach it. [Clothing](#) can be a great barrier between the sun's UV and your skin. Cover as much skin as possible with cool, loose-fitting clothing made from densely woven fabric like cotton. This includes tops that cover the chest, shoulders and arms, with elbow length sleeves and collars and longer style shorts or skirts. If a child is wearing a singlet top or dress with thin straps, they must add a t-shirt or shirt before outdoor play. Singlet tops and shoestring tops/dresses do not provide adequate protection in the sun.

Sun protective hat: A [hat](#) should shade the face, neck and ears such as a wide-brimmed or bucket hat (at least 5cm brim for young children) or legionnaire hat (make sure the front peak and back flap overlap at the sides). Caps and visors offer little protection to the cheeks, ears and neck, and are not considered a suitable alternative and should be swapped for a sun protective hat.

Sunglasses: Sunglasses are optional. If worn, it is recommended that glasses are a close fitting, wrap-around style that meet the [Australian Standard 1067 \(Sunglasses: Category 2, 3 or 4\)](#) and cover as much of the eye area as possible. Wearing a hat with a brim that shades the eyes can also reduce UV radiation to the eyes by up to 50%.

Sunscreen: [Sunscreen](#) should be labelled SPF30, SPF50 or SPF50+ and be broad-spectrum and water-resistant. For all children over 6 months, apply sunscreen to any skin not protected by clothing 20 minutes before going outdoors and reapply every two hours or more frequently if sweating, towel drying or after water activities. Make sure it has an Australian Licence (Aust L) number and monitor the expiry date. Store sunscreen below 30 degrees, in a supervised location and out of direct sun. Cancer Council recommends a [usage test](#) before applying a new sunscreen. The widespread use of sunscreen on babies under 6 months old is not recommended. From 3 years of age, children are encouraged to apply their own sunscreen under supervision of staff to help develop independent skills ready for school.

SunSmart: The name of the program conducted by Cancer Council to help prevent skin cancer: www.sunsmart.com.au

Ultraviolet (UV) radiation: [Ultraviolet \(UV\) radiation](#) is a type of energy produced by the sun and some artificial sources, such as arc welders and solariums. The sun's UV is the main cause of skin cancer. Too much UV exposure also causes sunburn, tanning, premature ageing, and eye damage. You can see the sun's light, you can feel the sun's heat, but you can't see or feel the sun's UV radiation. UV can reach you directly from the sun. It can also be reflected off different surfaces and scattered by particles in the air. Your senses cannot detect UV radiation, so you won't notice it is all around you and you won't immediately notice any damage.

UV Index: The World Health Organization's Global Solar UV Index measures UV levels on a scale from 0 (Low) to 11+ (Extreme). Sun protection is recommended whenever UV levels are 3 (Moderate) or higher. The UV level is affected by a number of factors including the time of day, time of year, cloud cover, altitude, location and surrounding surfaces. www.who.int

EVALUATION

In order to assess whether the values and purposes of the policy have been achieved, the Approved Provider and Person with Management or Control will:

- regularly seek feedback from educators, staff, parents/guardians, children, management and all affected by the policy regarding its effectiveness
- monitor the implementation, compliance, complaints and incidents in relation to this policy
- keep the policy up to date with current legislation, research, policy and best practice
- revise the policy and procedures as part of the service's policy review cycle, or as required
- notify parents/guardians at least 14 days before making any change to this policy or its procedures.

ATTACHMENTS

- Attachment 1: Authority for staff to administer sunscreen

AUTHORISATION

This policy was adopted by the Approved Provider of Panorama Heights Preschool on 28 April 2026.

REVIEW DATE: APRIL 2029

ATTACHMENT 1: AUTHORITY FOR STAFF TO ADMINISTER SUNSCREEN

Authority for staff to administer sunscreen provided by the service

I, _____, give/do not give permission for the staff at Panorama Heights Preschool to apply, as appropriate, SPF 30 (or higher) broad-spectrum, water-resistant sunscreen to all exposed parts of my child's body.

(Name of child)

Signature (parent/guardian)

Date

Authority for staff to administer sunscreen provided by the parent/guardian

I, _____, give permission for the staff at Panorama Heights Preschool to apply, as appropriate, to all exposed parts of my child's body the sunscreen that I have supplied and labelled with my child/children's name. This sunscreen is an SPF 30 (or higher) broad-spectrum, water-resistant sunscreen. I understand that this sunscreen will be kept at the service.

It is my responsibility to ensure there is always an adequate supply of this sunscreen at the service.
